## June Office Closure

WaterPro's office will close at 10:00 a.m. on Friday, June 24. Happy Father's Day—Sunday, June 19!

## Follow WaterPro, Draper City on Twitter

Keep up with what's happening in Draper by following WaterPro (@waterproinc) and Draper City (@drapercity) on Twitter.

We'll keep you up to date on flooding alerts, water-related emergencies like water main breaks, and office closures.

Draper City will keep you informed about events happening in our community.

You can also visit the Draper City website ([draper.ut.us](http://draper.ut.us)) to register your cell phone for reverse 911 notification in an emergency.

## It's Water Conservation Season!

In spite of our long, cold, wet spring, we know that hot, dry weather is on the way. While current talk is all about flooding, we know that water conservation is always important.

When you design your garden or set your sprinkler timers, keep conservation in mind. Here's a good place to start: [wateruseitwisely.com](http://wateruseitwisely.com). Visit our website ([waterpro.net](http://waterpro.net)) for additional conservation links.

## WaterPro History Corner: Win a Prize!

This month's question isn't exactly about history, but it does concern the basic convictions that have guided WaterPro/Draper Irrigation since we were incorporated over a century ago. The question is:

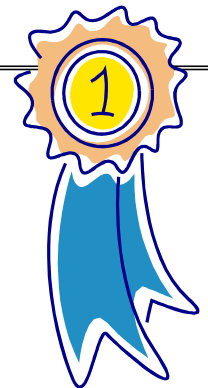

*What are the five values that are the basis of everything we do?*

You can find the answer on our newly redesigned website, [www.waterpro.net](http://www.waterpro.net). Email the correct answer to Diana Percival at [hope@waterpro.net](mailto:hope@waterpro.net) by 5 p.m. on Friday, June 17. From all correct answers we receive, we will draw one winner.

### Last Month's History Question

In what year was the Draper Irrigating Company incorporated?

The answer: 1888. Of the 14 correct answers we received, we drew the name of Hillary Howell. Congratulations, Hillary!

## Water Week Tours for Draper 4th Graders

WaterPro, in conjunction with Draper City and Jordan Valley Water Conservation District, hosted Draper fourth graders on a field trip in celebration of Utah Water Week.

On May 3, 4, and 5, these organizations hosted some 850 students, plus teachers and chaperones, on tours of WaterPro's an Jordan Valley's water treatment plants, as well as booths and presentations highlighting watersheds, stormwater, the water cycle, water conservation, and the history of water in Draper.

WaterPro and the other organizations hosted students from Oak Hollow, Willow Springs, Draper,

and Sprucewood public elementary schools, as well as from Summit Academy, Channing Hall, and St. Johns Elementary. The field trips were funded by the participating organizations and a grant from Jordan Valley Water Conservation District, and were provided at no cost to the schools or students.

This is the second year that WaterPro, Draper City, and JWCD have hosted this event, and we plan to continue it into the future. We believe strongly in the value of education about the importance of water, water conservation, protecting our watershed, and keeping stormwater free from pollution.

Fourth-graders display the water bottles they received as part of their Water Week observance.

## Free Landscape Classes at the Conservation Garden Park

Jordan Valley Water Conservancy District's Conservation Garden Park is a great place to learn anything you want to know about gardening in Utah. Tour the beautiful demonstration gardens, talk with the staff, or take one of the many free classes offered throughout the growing season.

For more information, visit the garden at:

8215 South 1300 West  
West Jordan, UT

Admission is free and the garden is open 7 days a week.

For information on classes, visit [conservationgardenpark.org](http://conservationgardenpark.org).

Students use a hands-on exhibit that demonstrates the importance of watershed protection.
